Take full control of your IoT Service

with a platform that's Simple. Smart. Secure.

Vodafone Business Managed IoT Connectivity Platform

vodafone business

Simplify IoT Management

Managing thousands of connected devices across global networks can be overwhelming, especially when visibility, control, and security are non-negotiable. That's where **Vodafone Business Managed IoT Connectivity Platform** steps in.

Designed for businesses of all sizes across all industries, it empowers business users to deploy, monitor, and optimise IoT SIMs with ease. This secure, self-service platform offers real-time insights, role-based access, and customisable reporting, giving your teams full control over their IoT estate.

With over 215 million IoT connections, coverage in 180+ countries, and **recognition as a Gartner Magic Quadrant Leader for 11 consecutive years**, Vodafone delivers unmatched scale, reliability, and innovation.

IoT is transforming the way businesses operate. There are now 18.8 billion active IoT devices worldwide in 2025[1].

Many businesses using IoT struggle with managing devices, networks and data across different locations. Without a central platform, they face slow operations, poor visibility, and rising security risks. Organisations often rely on outdated systems and manual processes, which leads to technical debt and makes it harder to scale or respond quickly to problems[2].

IoT connectivity is shifting from basic coverage to smarter, more secure and compliant solutions. Businesses now need tools that support performance, automation and regulatory demands[3]. Many companies lack a clear strategy and struggle to link IoT projects to business goals, especially when data is siloed or hard to access[4]. A Managed IoT Connectivity Platform helps solve these issues by giving businesses better control, faster operations and stronger security, all in one place.

How our Managed IoT Connectivity Platform helps solve your challenges:

Intelligent self-service management

Configure and monitor your IoT SIMs with ease on a user-friendly dashboard, using features like saved searches, sequenced actions, and role-based access.

Transparent and custom reporting

Generate tailored reports on demand to track performance and usage, in a format that suits you.

Accelerate operations

Streamlined workflows reduce the number of steps needed for day-to-day tasks, saving time and improving productivity.

Security and compliance

Built-in safeguards like SSL encryption, AMEI lock, and fraud detection ensures your data is protected.

Enhance collaboration

Shareable SIM links and a unified workspace allow your teams to collaborate in real-time.

Advanced capabilities

A platform that supports the multiple SIMs we have available for every environment.

Vodafone is a global leader in IoT connectivity, here's why businesses choose us:

Global network strength

We manage over 215 million IoT connections across 180+ countries, including highly regulated markets, with access to 580+ networks spanning 4G, 5G, LPWA, satellite and fixed.

Expertise at scale

Our 550+ IoT specialists provide localised support and innovation, helping customers deploy and manage IoT confidently and efficiently.

Industry recognition

Vodafone has been recognised as a Leader in the 2025 Gartner® Magic Quadrant™ for Managed IoT Connectivity Services, worldwide for the 11th time in a row.

Security by design

Our platform is built with multi-layered protection and compliance at its core, giving customers peace of mind.

Built to scale

Our SIM portfolio supports every environment, from smart cities to industrial automation, ready for today and tomorrow.

Driven by customers

We continuously evolve our platform in-house based on real feedback, ensuring it stays intuitive, effective and future-ready.

Simplify, scale and secure your IoT Service

The **Vodafone Business Managed IoT Connectivity Platform** is more than just a tool. It's a strategic enabler for digital transformation.

With Vodafone Business, you'll get unmatched global coverage, deep industry expertise, and a committed focus on what matters to you most.
