

Drive agility and scale with secure, flexible, future-ready connectivity

Vodafone Business Network-as-a Service

More than a new way to connect. It's a smarter way to operate.

As digital demands grow and AI-driven workloads surge, your business needs more than bandwidth. You need automation. Intelligence. Agility. Delivered as a service.

That's why we built **Vodafone Business Network-as-a-Service**. A cloud-based, software driven platform that allows your network to adapt in real-time, deploy in minutes, and integrate seamlessly with your IT and security environments.

Delivered on a flexible, consumption-based model, it gives you the freedom to scale, connect new sites and optimise performance. All at the pace your business demands.

Powered by Vodafone's global reach and partner ecosystem, this is connectivity designed for composable infrastructure and intelligent operations. Let's make networks work, the way you do.

Can your network keep up with your ambition?

The way businesses connect is being transformed by digital acceleration, cloud, and AI. Yet, many organisations are held back by legacy infrastructures that are fragmented, slow to change, and unable to deliver the reliability, agility or intelligence modern operations demand.

Legacy infrastructure means bandwidth upgrades are difficult, observability is limited, and compliance is a constant challenge. As AI workloads and multi-cloud adoption surge, static networks struggle to keep up. This leads to unpredictable performance, costly downtime, and rising security risks.

According to Gartner, 30% of enterprises will automate more than half of their network activities by 2026, but most still rely on manual processes and siloed tools[1]. IDC finds that 93% of enterprises use multiple public clouds, yet only a minority feel confident managing hybrid, multi-cloud networks due to complexity and lack of visibility[2].

Without intelligent, integrated, and on-demand networks, businesses risk falling behind, unable to innovate, scale, or secure their operations in a digital-first world.

Take control of your connectivity today

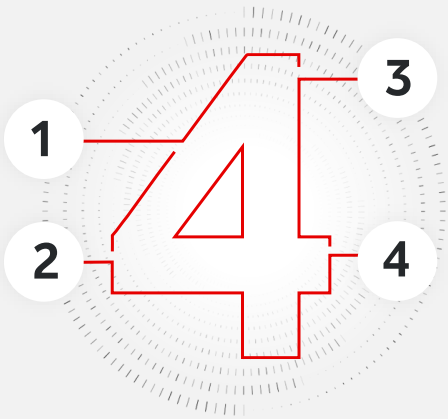
The **Vodafone Business Network-as-a-Service** platform solves today's challenges of fragmented environments, legacy limitations, and manual processes. It gives you the agility to innovate, the intelligence to optimise performance, and the security to stay compliant, so your network becomes a strategic enabler for your business. Discover how it delivers measurable value:

Accelerate transformation

Rapidly deploy and scale secure, high-performance connectivity to support new business models, digital initiatives, and AI workloads. This enables your organisation to move at the speed of opportunity.

Drive operational efficiency

Streamline network management with a single portal, AI-powered automation, and flexible service models. Your teams are freed up to focus on innovation and strategic priorities.



Enhance resilience and compliance

Rely on always-on connectivity, integrated security, and automated compliance features to protect your business, maintain uptime, and meet evolving regulatory demands.

Optimise costs and agility

Benefit from usage-based billing, dynamic resource allocation, and simplified operations. You gain greater control over budgets and the flexibility to adapt as your needs change.

Making it happen: The how behind the benefits

Unifying fixed, wireless, SD-WAN, SASE, and multi-cloud connections into a flexible, modular platform, that's all managed through a single, easy-to-use portal.

Dynamic Connectivity

Instantly scale bandwidth and performance to meet changing business needs and AI workloads.

Unified Management

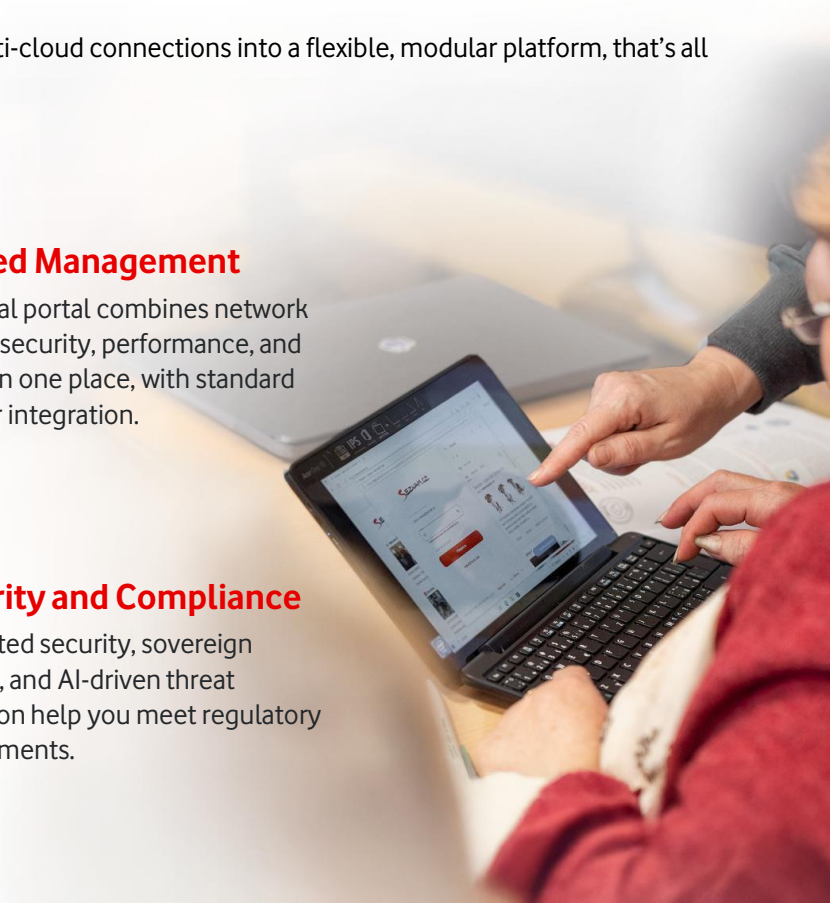
A central portal combines network health, security, performance, and billing in one place, with standard APIs for integration.

AI-Powered Automation

Predictive insights detect anomalies, recommend fixes, and automate routine tasks, with AI assistants for support.

Security and Compliance

Integrated security, sovereign routing, and AI-driven threat detection help you meet regulatory requirements.



Why choose Vodafone Business?

Vodafone Business Network-as-a-Service is more than just a new way to manage connectivity. It's how we help you move beyond legacy networks to intelligent, agile infrastructure.

What sets us apart:

Global reach and reliability

Our network connects 192+ countries and carries 10% of the world's internet traffic, delivering consistent performance and scale.

Flexible service models

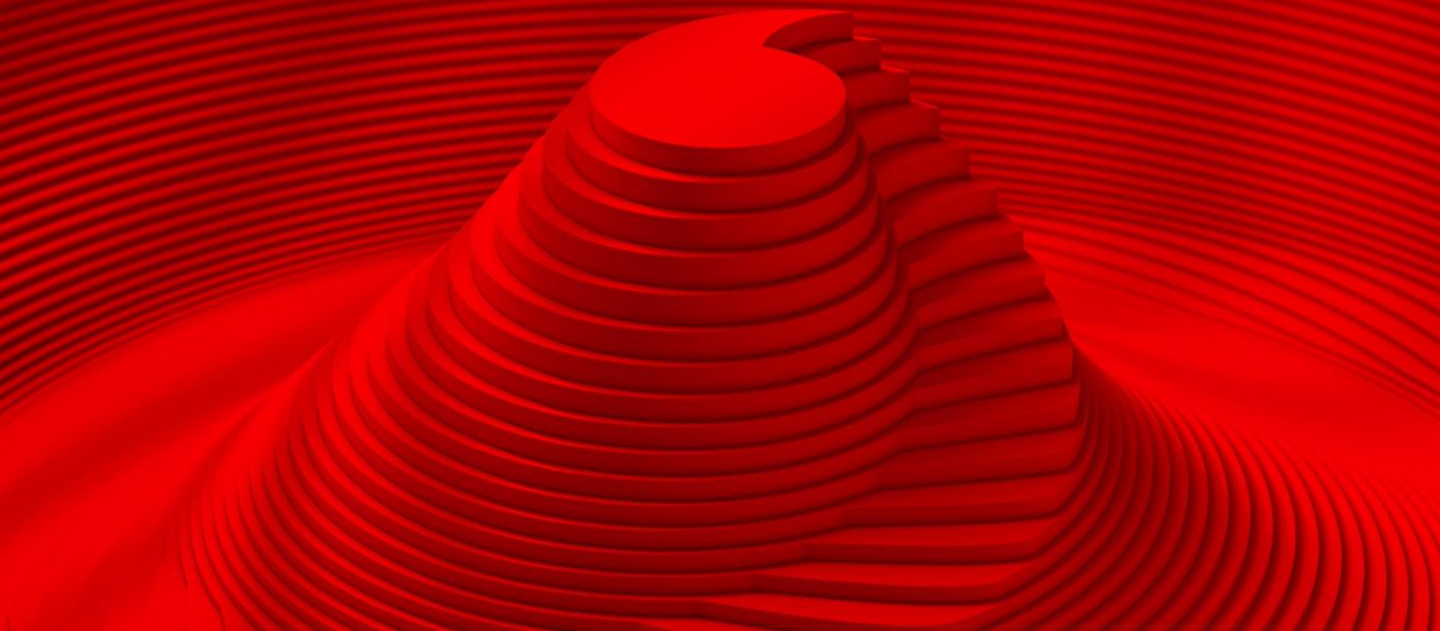
Choose fully managed, co-managed, or self-managed options to match your needs, supported by 24/7 network and security operations.

Innovation at the core

Our platform uses AI for predictive analytics, anomaly detection, and automated remediation, helping you stay ahead of disruptions.

Industry recognition

Vodafone Business is trusted by leading enterprises and recognised by analysts for our ability to secure, intelligent, and future-ready networks.



USE CASES

Where Vodafone Business Network-as-a-Service makes a difference:

Internet On-Demand

Activate high-speed internet connectivity instantly for new sites, pop-up locations, or temporary events. It's ideal for rapid deployment, providing reliable access before fibre infrastructure is available and supporting dynamic business needs.

Business Internet 5G FWA On-Demand

Benefit from flexible, wireless connectivity to quickly set up remote offices, disaster recovery, and locations where traditional wired connections are not practical. 5G slicing and back-up options ensure resilience and business continuity.

Multi-Cloud Networking On-Demand

Connect public and private clouds, AI services, and IoT devices securely on one platform. Manage multi-cloud strategies with integrated security, seamless connectivity, and centralised control, supporting digital transformation and innovation.

SD-WAN/SASE On-Demand

Enable your teams to deploy secure, software-defined networking and security services on demand. Allow real-time policy adjustments, automated threat detection, and simplified management through a single portal, helping you stay agile and compliant.

Prepare for the future of smarter communications

Yesterday's networks played by the rules. Tomorrow's networks rewrite them. **Vodafone Business Network-as-a-Service** not only provides a framework for growth, but accelerates it by making your network programmable in line with your ambition.
